JLEDS is an official Distributor for the QLT Multicurrent LED DALI/1-10V/PUSH Dimmable Driver, QBOXD & QBOX11.

🇬🇧 Multicurrent LED Driver DALI/1-10V & Push

- Driver for independent mounting - IP20 - Insulation class II
- Output in steady current: 600÷2100mA, ± 5% settable by dip-switches (see scheme)
- QBOXD: DALI or Push-Button input (state memory) with possibility of synchronising of more drivers together
- QBOX110: 1-10V input. Control by 0-10V, on request
- Output 12v 100mA for cooling fan
- Input voltage: 100V ÷ 250V/AC - Steady output. On request, 230VDC input voltage

🇮🇹 Alimentatore LED multicorrente DALI / 1-10V & Push

- Alimentatore indipendente - IP20 - Classe II di isolamento
- Uscita in corrente costante 600÷2100mA, ±5% programmabile con DIP-switches (vedi schema)
- QBOXD: Ingresso DALI o Pulsante (con memoria di stato) con possibilità di sincronizzazione con altri alimentatori
- QBOX110: Ingresso 1-10V. A richiesta, versione 0-10V
- Uscita 12V 100mA per ventola
- Alimentazione: 100V ÷ 250V/AC - Uscita stabilizzata. A richiesta alimentazione a 230VDC.

🇩🇪 Multicurrent LED-Treiber DALI/1-10V & Push

- Unabhängiger Treiber - IP20 - Isolationsklasse II
- Ausgang in Konstantstrom 600÷2100mA, ±5% einsetzbar durch DIP-Switches (Sehen Schema hier unten)
- QBOXD: DALI oder Tastereingang (Memory) mit möglicher Synchro von mehreren LED-Treibern
- QBOX110: 1-10V Eingang. Ausführung 0-10V, auf Anfrage
- 12V 100mA Ausgang für Lüfter
- Speisung: 100V ÷ 250V/AC - Stabilisierter Ausgang. Auf Anfrage, Speisung auf 230VDC

🇫🇷 Alimentation LED courant multiple DALI/10V & Push

- Alimentation indépendante - IP20 - Classe II d'isolation
- Sortie en courant constant 600÷2100mA, ±5% programmable avec DIP-Switch (voir schéma)
- QBOXD: Entrée DALI ou bouton-poussoir (mémoire) avec possibilité de synchronisation avec d'autres appareils
- QBOX110: Entrée 1-10V. Sur demande, 0-10V.
- Sortie 12V 100mA pour ventilateur
- Alimentation: 100V ÷ 250V/AC - Sortie stabilisée. Sur demande, alimentation à 230VDC

🇪🇸 Controlador Led multicorriente con DALI/1-10V y pulsador

- Convertidor independiente - IP20 - Clase II
- Salida de corriente constante 600÷2100mA, ±5% programable con DIP-SWITCH (ver diagrama)
- QBOXD: Entradas DALI o Pulsador con la posibilidad de sincronización de más controladores (con memoria)
- QBOX110: Entrada 1-10V. Salida 0-10V, bajo pedido.
- Salida de 12V 100 mA para el ventilador de refrigeración
- Tensión de entrada: 100V ÷ 250V/AC - Salida constante. Bajo pedido, tensión de entrada a 230VDC
