## COB5 LED FLEXI STRIP

CE RoHS

| Technical information                           | JL-IP20-COB5-8-480-15W-12V or 24V                                                                                      |
|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| <b>Description</b>                              | Superb choice to provide a non-spotting effect, giving a high performance and an excellent colour rendition.           |
| <b>Grade</b>                                    | Grade "A" LED flexi strip                                                                                              |
| <b>IP Rating</b>                                | IP20 and IP67                                                                                                          |
| <b>LED Quantity/ Wattage / Lumens Per Metre</b> | SMD 480pcs / 15W and 1500lm per metre                                                                                  |
| <b>LED voltage</b>                              | 12VDC and 24VDC                                                                                                        |
| <b>Roll Length</b>                              | 5M roll                                                                                                                |
| <b>Cut Point</b>                                | 12V 25mm, 24V 50mm                                                                                                     |
| <b>Width of strip</b>                           | IP20 = 8mm, IP67 = 10mm                                                                                                |
| <b>Colour Temperature</b>                       | 2700K, 3000K, 4000K, 6000K, Red, Green, Blue, Yellow, Orange, Pink, Tiffany Blue (Light Blue), Mars Green (Dark Green) |
| <b>CRI</b>                                      | Ra90                                                                                                                   |
| <b>Adhesive type</b>                            | 3M 300LSE (High Temperature resistant)                                                                                 |
| <b>Energy rating</b>                            | Class A                                                                                                                |
| <b>Warranty</b>                                 | 3 Years                                                                                                                |
| <b>Dimmable</b>                                 | Yes                                                                                                                    |
| <b>Profile is often sold with these items</b>   |                                     |
